🪪 Profile

Quick learner, adaptable to any
framework or tool
skilled in Python, Go, JavaScript
and Dart libraries and
frameworks.

🎓 Education

B.Sc. Mathematics (Ongoing),
Addis Ababa University
2023 - present

📂 Projects

Spam Email Detection system(ML), *Built and deployed a Flask-based machine learning web app that classifies emails as spam or not using a TF-IDF + Logistic Regression pipeline. Trained on 33K+ Enron-style emails and deployed live using Render.*

Basic Social Media App in Flutter, *Developed a Flutter app with Bloc for state management and Firebase for user auth and database. Used Supabase for media storage. Includes core features like posting, comments, and user profiles.*

LinkedIn Post Generator(MERN Stack), *Built a MERN stack app that fetches articles from RSS feeds, analyzes them, and auto-generates LinkedIn posts (with hashtags) using the ChatGPT API. Highlights top 3 posts for easy content sharing.*

University Q&A Platform (Django), *Developed a Django-based web app for students to ask, answer, and browse department-specific academic questions.*

Instagram UI Clone (Nuxt 3), *Built a responsive Instagram-style front-end using Nuxt 3 to replicate core layouts like feed, profile, and stories — UI only.*
